Election/Restrictions

1. Applicant's election of invention I in Paper No. 10 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Specification

2. The disclosure is objected to because of the following informalities: On page 10 line 20, the phrase "my be similar angled" is not understood. On page 17 line 8 does not correctly coorespond to figure 22, as according to the figure, arm 120 pivots on pin 111, not 132. Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in-

(1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effect under this subsection of a national application published under section 122(b) only if the international application designating the United States was published under Article 21(2)(a) of such treaty in the English language; or
(2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that a patent shall not be deemed filed in the United States for the purposes of this subsection based on the filing of an international application filed under the treaty defined in section 351(a).

3. Claim 1 is rejected under 35 U.S.C. 102(e) as being anticipated by Lykken et al. (6,318,484).

Lykken et al. discloses a track assembly having all of applicant's claimed structure including a top tandem arm 102, and a bottom tandem arm 200. Lykken et al.

Art Unit: 3671

further discloses a top portion of the bottom tandem arm being pivotally connected to the top tandem arm, and a front tandem arm idler wheel 164, a rear tandem arm idler wheel 162 and a belt 144 as shown in figures 3 & 4.

Allowable Subject Matter

4. Claim 2 is allowed.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The prior art of record discloses various track systems.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Victor Batson whose telephone number is (703) 305-6356. The examiner can normally be reached on Monday through Friday (except Wednesday).
